

### ***What is Step into Health?***

Step into Health connects employers in the NHS to people from the Armed Forces community, by offering an access route into employment and career development opportunities. The programme recognises the transferable skills and cultural values that Armed Forces personnel develop when serving, and how they are compatible with those required within NHS roles.

### ***Who is it for?***

The programme is open to all service leavers, veterans, their spouse/partner and dependants. Whether you are interested in catering, maintenance, administration, finance, communications, management or a role in one of the clinical services, to name but a few, this programme will benefit you. The NHS is keen to invite you to explore your transferable skills and the potential training and career opportunities available.

### ***Why is the NHS right for me?***

The NHS is the largest employer in Europe, with in excess of over 350 different career opportunities available, over half of which are non-clinical. For more information on roles within the NHS, please visit the [Health Careers website](#).

During the recent public launch event HRH Duke of Cambridge, who sponsors the programme through The Royal Foundation said,

*“Many of the values that the NHS espouses are well understood and widely practiced within the Armed Forces: close teamwork, commitment, compassion, respect, dignity and professionalism. Likewise, the skills and experience that veterans can offer employers are highly sought after and valued within the NHS. By that I mean, for example, an ability to operate under pressure, courage in the face of adversity, leadership and management together with – above all – a strong and unwavering sense of public duty.”*

### ***Where can I find out more information?***

There are over 50 NHS employers across England looking to recruit from the Armed Forces community. To connect with your local Step into Health organisation please visit the website at [militarystepintohealth.nhs.uk](http://militarystepintohealth.nhs.uk)
